

# 11<sup>th</sup>Annual Doctoral Student's Day

## Information Science and Communication Studies

### GERiCO Laboratory

Thursday, May 18<sup>th</sup> 2017

University of Lille 3, Villeneuve d'Ascq, France

A PhD thesis is a period of scientific growth rich in discoveries: discovering a discipline, a research laboratory, a research team... In addition, PhD students in Information Science and Communication Studies work on a wide variety of objects: documents, information behaviour, knowledge management, media studies, cultural mediation or corporate communication. This diversity of approaches, research subjects, and research fields are part of the wealth of these disciplines. However, this variety can create distance between students working in different research teams or fields, who have only rare opportunities to exchange about their work.

The 11<sup>th</sup>Annual Doctoral Students' Day is organised by PhD students studying at the University of Lille 3 (GERiCO Laboratory), who wish to communicate and exchange about their research themes, theoretical and epistemological issues, and methodological reflections, with students from other universities, all in an atmosphere of confidence and sharing.

The call for participation, therefore, is aimed at students in the early stages of their thesis as well as students in their final stages. Students can participate in French or in English. The meeting will include oral presentations while speakers will benefit from the feedback of GERiCO laboratory researchers. Each edition is moderated by two guest speakers in Information and Communication Sciences whose main aim is to present the approaches and discuss the innovative themes of the Information Science.

#### Keynotes

- Yves Jeanneret (Professor in Information Science)
- SethVan Hooland (Professor in Information Science)

#### Call for Papers

- All PhD students working in the field of Information Science and Communication or Media Studies, whatever his or her year of enrolment, are invited to participate. Discussions will cover the following topics: Research question
- Material and methods
- Theory
- Research protocol
- Expected result
- Analysis

All research topics and approaches are welcome

#### Editorial Guidelines

Each PhD student, regardless of his or her thesis registration year, is invited to communicate in the 11th Annual Doctoral Students' Day. The participation proposal document should be in Word format and the font type should be Times New Roman of size 12. The document should include the following information:

- The author's contact information (first name, email address, telephone ...)
- The thesis Year
- The working title of the thesis
- Title of proposed communication
- A 500 words summary of the communication content
- A series of three keywords that describe the intended communication

### **Deadlines**

The participation proposal document (500 words) should be submitted by email to [jjc.geriico@gmail.com](mailto:jjc.geriico@gmail.com) before April 3th, 2017. Guidelines for your talk (time limits, schedule, and related workshops), which will be defined depending on the number of participants, will be sent by April 10th, 2017.
